

# PowerMic™ II

Speech Recognition Hand Microphone for Use with Dragon® Medical Practice Edition, Dragon Medical Network Edition, PowerScribe 360®, eScripton Clinician Console, and Enterprise Express®.

The PowerMic™ II from Nuance is specially designed for enhanced physician productivity, providing ergonomic control of both standard dictation and speech recognition functions.

The PowerMic II microphone offers simplified, thumb-control operation for dictating, navigating, reviewing, and editing speech recognition generated documentation.

### Full Dictation Control

The PowerMic II advances physician PC dictation to a new level, making it easier and faster to control voice recording, navigate and select fields in on-screen templates and standard reports, and move throughout recognized text reports for review and editing.

In addition to providing complete dictation control, the PowerMic II incorporates full-function, Microsoft® compatible, PC-Mouse capabilities into the microphone to reduce the need for care givers to continually move between the microphone, mouse, and keyboard.

### Features

- USB connectivity for easy plug-and-play installation as well as eliminating the need for sound card-enabled PCs.
- Integrated Barcode Scanner (optional model) for entering MRN, accession number, or other barcode-driven data, with audible feedback upon successful barcode scan.
- Unidirectional microphone with noise-cancellation ensures higher accuracy in even the noisiest environments.

Using the PowerMic II, users can rapidly navigate report template fields, then record and use “voice fill-in” capabilities to insert recognized text into report template fields. By combining an ergonomic hand microphone with PC mouse functions, physicians will gain new levels of dictation speed, ease-of-use, and productivity.

**Flush, Angled Microphone Element** for user comfort and optimal recording level/signal.

**Primary Dictation Controls**  
Record, Rewind, Play, Fast Forward, Enter/Select

**Transcribe Button** to recognize speech or send dictation to a transcriptionist automatically, when physician self-completion is not utilized.

**Tab-Forward/Tab-Backwards** for speeding navigation through voice-driven templates and form fill-ins.

**“Track-Point” Button and Left/Right “Mouse” Button** to control the onscreen cursor, navigate and select functions.
