

Nuance® Dragon® Dictate Medical for Mac®

Voice-enabled productivity for clinicians.

Dragon Dictate Medical for Mac is a flexible speech recognition solution that enables the clinician to quickly capture comprehensive clinical documentation while spending more time on what matters—their patients. Dragon Dictate Medical for Mac streamlines documentation workflow by allowing clinicians to dictate appointment and medical record notes directly into their EHR, such as MacPractice, as well as easily turn audio recordings into text. In addition, clinicians can dictate and edit documents, or control their Mac all by voice within popular web, email and desktop applications such as Microsoft® Office or Gmail. Dragon Dictate Medical for Mac's accurate speech recognition adapts to the user's voice and words, with customizable vocabulary and commands and an easy-to-use interface. Spend less time typing and more time with patients to improve patient satisfaction, practice volume and profitability.

Features and benefits

Enable greater productivity for clinicians all by voice:

- Dictate 3x faster than typing with up to 99% accuracy.
- Make fewer edits and get more work done.
- Spend more time with patients.

Accuracy for medical terminology:

- Enhanced speech engine, with sophisticated acoustic and language models, ensures Dragon Dictate Medical for Mac quickly and accurately captures specific medical terminology.
- Vocabularies covering more than 90 medical specialties and subspecialties, to ensure proper clinical documentation.
- Dragon Dictate Medical for Mac adapts to the user's voice and words used to deliver better recognition results over time.

Medical and other documents the way you work:

- With your voice, create and edit appointments and medical record notes directly into EHR and other applications, improving productivity and quality.
- Although Dragon Dictate Medical for Mac works with virtually any EHR, it fully supports MacPractice for direct text control and dictation for a complete user experience on the Mac.
- Accurately dictate and edit documents, or control your Mac all by voice within popular web, email and desktop applications such as Microsoft Office or Gmail.

New in version 4 of Dragon Dictate Medical for Mac

- Support for OS X Yosemite (10.10), in addition to OS X Mavericks (10.9)
- Higher performance and faster editing with pure 64-bit application and improved memory management capabilities
- Improved accuracy over version 3, with optimization for latest speech recognition technology, gives improved recognition and accuracy for over 90 medical specialties
- Updated versions of medical vocabularies
- Support for “General English” vocabulary
- Full Text Control for creating emails in Gmail™ and voice control your Gmail inbox within Safari® and Firefox®
- Accurately transcribe an audio file of any single speaker's voice from podcasts or pre-recorded audio files

- Easily create custom word lists and macros for frequently used text, giving you the flexibility to customize Dragon Dictate Medical for Mac for the way you work.

Spend more time with patients:

- Clinicians can provide richer detail per patient with greater accuracy, and faster than with an EHR system alone.
- Faster, more accurate response reduces documentation time and allows clinicians to see more patients which increases practice revenue and profitability.
- Dragon Dictate Medical for Mac supports HIPPA patient confidentiality guidelines, a critical requirement for any practice concerned with patient confidentiality.

Powerful transcription of recordings into text:

- Capture thoughts from anywhere, at any time, while they are still fresh to produce detailed, high-quality medical notes. Great for busy clinicians, on-the-go.

- Easily transform your dictation into text, by using a Nuance-approved digital voice recorder or the free Dragon Recorder app to capture high-quality audio files using an Apple iPhone, iPad or iPod touch (4th gen and up).

- Accurately transcribe a pre-recorded audio file or podcast of a single speaker's voice with the same accuracy for medical terminology as transcribing your own voice recording.

- Easily proofread medical documents with the Text-to-Speech feature which enables Dragon Dictate Medical for Mac to read back your text.

System requirements

- CPU: Intel® Core 2 Duo 2.4Ghz or faster processor - Intel Core i3, i5 or i7 recommended
- Free hard disk space: 8GB
- Supported Operating Systems: OS X® Mavericks (10.9) or OS X Yosemite (10.10)
- RAM: 4GB, 8GB+ recommended

- USB2.0/3.0 port for product installation
- A Nuance-approved noise-canceling headset microphone for Mac (included in purchase)
- Note: An Internet connection is required for automatic product activation (a quick anonymous process)
