

# Productivity for the enterprise

What's new in Dragon Professional Group.

Dragon® Professional Group enterprise-ready speech recognition software enables fast, accurate dictation with robust customization features to improve documentation productivity for multiple users within an organization—whether they're in the office or on the road. This powerful solution, which provides support for Citrix® virtualized environments, and can be centrally administered with usage tracking and license management through the Nuance® User Management Center, helps corporations work smarter and more efficiently for bottom-line results.

#### **Central administration for Dragon Professional Group**

Dragon Professional Group is enabled to work with Nuance User Management Center. Designed for corporate deployments of Dragon Professional Group speech recognition software, Nuance User Management Center provides powerful, yet easy-to-use central user administration capabilities that allow organizations to enable and manage these solutions across multiple users. Nuance User Management Center helps businesses to ensure efficient use of their licenses, meet requirements for reporting accuracy, and centrally manage their Dragon Professional Group deployments for significant time and cost savings. This

capability was available in Dragon Professional v13.5.

For legal organizations, the Nuance User Management Center can easily manage both Dragon Professional Group and Dragon Legal Group licenses, depending on the individual users' needs. An administrator for example, can easily assign or switch a license via a license key, saving time by centrally managing both product deployments as needed.

#### **Support for published applications in Citrix virtualized environments**

Dragon Professional Group supports installation on Citrix XenApp® or Citrix XenDesktop® servers, enabling users to dictate from workstations that do not have Dragon installed. In this configuration, the Dragon application is only installed on the same Citrix server as the target application that will be used for dictation, such as Microsoft Word or a records management system. By installing Dragon on a Citrix server computer, you can have Dragon rely on the Citrix server for all processing activities. Furthermore, deploying Dragon on a Citrix XenApp or Citrix XenDesktop server provides Dragon users with Full Text Control, for supported applications running on that same Citrix server. This capability was available in Dragon Professional v13.5.

### **Enhanced transcription**

Dragon Professional Group offers the ability to accurately transcribe another single speaker's voice from pre-recorded audio files or from podcasts without having to create and train a profile using a recording of that single speaker reading pre-selected text. To transcribe an audio file, Dragon checks if your profile needs a transcription source created and will lead you through a training process. If your audio recording is of a different speaker, you must create a new profile. Only a 90-second audio clip of that speaker (instead of the speaker personally present to read a passage) is required for training. .m4a format is now supported (in addition to .wav, .wma, .mp3, .dss and .ds2).

### **Easier to use**

Dragon Professional Group offers the following features to make it even easier to use:

- Newly designed Dictation Box, so you can easily create or edit text by voice even in applications not supported by Dragon
- Additional help with in-context commands when user asks "What can I say?" at any time, giving you not only a hint on the spot but allowing you to learn these essential commands over time
- A list of relevant commands will immediately assist you if

you ask "What can I say?" when working in for example, Outlook®, Word, WordPerfect®, Excel®, Web browsers (i.e., Chrome™, Firefox®) and on the desktop

- The "What can I say?" window offers additional help with the following:
  - Show navigation commands
  - Show correction commands
  - Show formatting commands
  - Show punctuation commands
  - Open Help
- Easier access and management of "Text-and-Graphics" commands (or "auto-texts") in the Tools menu
- Easier access and management of user-defined commands in the Tools menu with "Manage Custom Commands" option

### **Windows 10 logo certification**

Dragon Professional Group is Windows 10 logo certified.

### **Office 2016 support**

Dragon Professional Group is fully tested and supported with Full Text Control capabilities and Natural Language Commands with Microsoft Office 2016.

### **Nuance PowerMic II support**

Dragon Professional Group supports Nuance PowerMic II. PowerMic II is a robust, ergonomic handheld microphone featuring simplified, thumb-control operation (for dictating, editing, navigating, and

reviewing documents using speech recognition), programmable buttons and integrated mouse functionality. It is ideal for professionals who are looking for new levels of dictation speed, ease-of-use and productivity.

### **Enhanced OLP program**

The Open License Program (OLP) for Dragon licensed products has been enhanced:

- New OLP program is easier to track and understand making it easier for customers to do business with Nuance
- The point system is eliminated - tiers are based solely on unit volume
- Purchasing is now cumulative over the customer lifetime, instead of time limit based
- Purchase tiers include both Dragon Professional Group and Dragon Legal Group
- Lower starting point: customers can buy as little as one unit
- Some modifications have been made to discount levels and tiers. For existing customers, please contact your Nuance representative.
